MAP would like to thank the Baltimore Jewish Council and The Associated: Jewish Community Federation of Baltimore for the design and publication of the 2014 Poverty Profiles.

Maryland at a Glance

Maryland is the wealthiest state in the United States of America. Yet, 50 years after President Lyndon Johnson launched the War on Poverty, one in every 10 Marylanders lives below the federal poverty line – almost 575,000 individuals. There is still an incredible amount of work that needs to be done.

Despite the conclusion of the Great Recession, economic recovery remains sluggish and those living in or near poverty have not benefited from recent economic gains. Ninety-five percent of all income gains since 2009 have gone to the top one percent. The lethargic journey to widespread economic security has left many of our neighbors underemployed, jobless, and even homeless, ultimately forcing many Marylanders to seek public assistance to meet their basic needs.

Maryland Poverty Profiles is a compilation of key factors and indicators that reflect the context and realities of poverty in Maryland and each of its 24 local

jurisdictions. The Maryland Alliance for the Poor (MAP) hopes that this data will be a launching point to consider how we can take collective action to reduce and prevent poverty in our state. Although this report quantifies the nature and extent of poverty at the county level, we cannot forget that underneath these numbers and data are people struggling daily to take care of themselves and their families.

Below is a chart showing the different income levels of some key constituent groups in Maryland.

- As you can see, the cash assistance programs (TCA & TDAP) aid those who are far below the poverty line – and while they alleviate suffering, the families remain in poverty. The cash assistance is often supplemented with other benefits – such as food stamps - in order for a family to survive below the poverty line.
- A family of three with one member working a minimum wage job will have an income below the poverty level unless

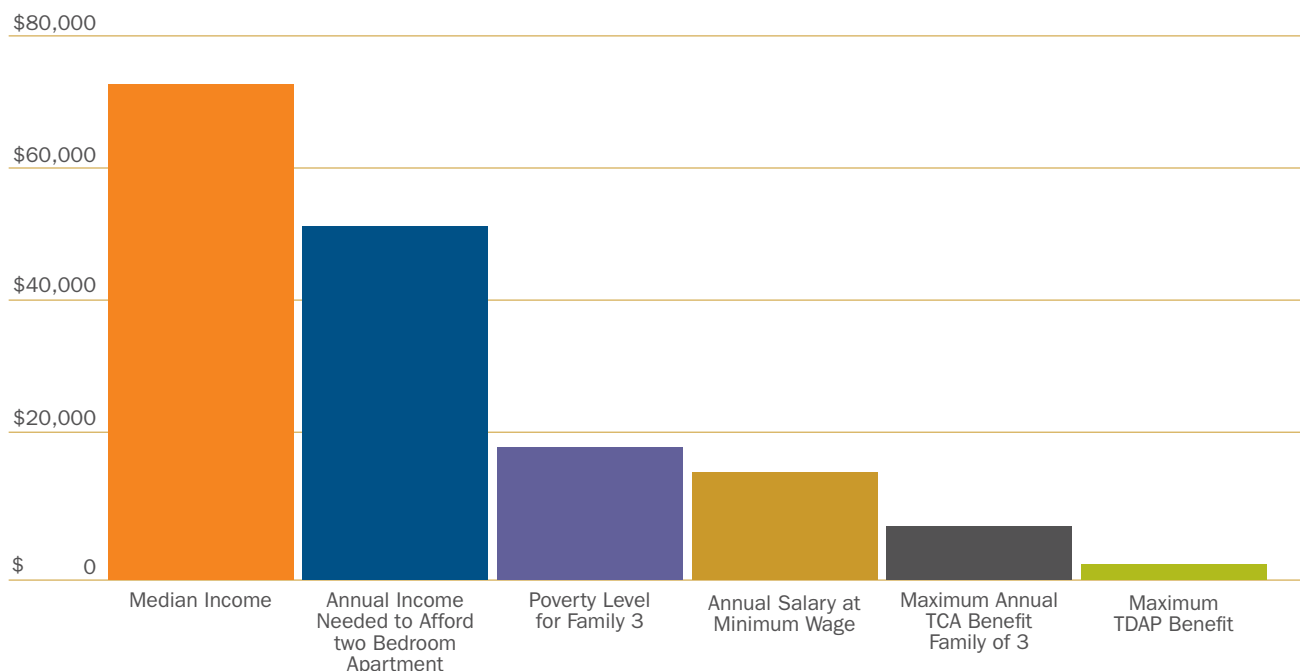

they access public benefits such as child care vouchers, energy assistance or the Food Supplement Program. Often, many of these programs that help working families – like subsidized housing – have very long waiting lists.

- Families at the poverty level have an annual income that is less than half of what is considered enough to afford renting a two bedroom apartment in Maryland.

Maryland could be a leader in ending cyclical poverty by providing opportunities for all individuals to achieve economic success and fulfill their unique potential. MAP supports the state in prioritizing the well-being of Maryland's most vulnerable residents.

We hope this report provides helpful information both to understand the extent of poverty in Maryland, and to work more effectively to reduce and prevent it.

Income Levels

Allegany County

POPULATION OF ALLEGANY COUNTY:

74,495

NUMBER OF PEOPLE IN ALLEGANY COUNTY LIVING IN POVERTY IN 2012:

11,253

In 2012, one in 10 Marylanders (approximately **572,400** people) lived in poverty including **13.3 percent** of children and **7.6 percent** of seniors. This is despite the fact that Maryland was the wealthiest state in the country with a median income of **\$71,707**. The Maryland Alliance for the Poor (MAP) periodically provides updates of poverty indicators in the 24 Maryland jurisdictions. We have also included participation rates for selected social-safety net programs. We hope this report provides helpful information, both to understand the extent of poverty in our state and to work more effectively to reduce and prevent it in Maryland!

NUMBER OF PEOPLE IN CARROLL COUNTY LIVING IN POVERTY IN 2012:

8,503

In 2012, one in 10 Marylanders (approximately **572,400** people) lived in poverty including **13.3 percent** of children and **7.6 percent** of seniors. This is despite the fact that Maryland was the wealthiest state in the country with a median income of **\$71,707**. The Maryland Alliance for the Poor (MAP) periodically provides updates of poverty indicators in the 24 Maryland jurisdictions. We have also included participation rates for selected social-safety net programs. We hope this report provides helpful information, both to understand the extent of poverty in our state and to work more effectively to reduce and prevent it in Maryland!
